

DC Power - Eltek, GE, Vertiv (Emerson), Alpha

Exceling at DC power equipment, Diversitec is a designated Eltek power electronics premier power integrator for the United States; one of only five companies holding this designation. This means you receive significant savings with Diversitec's competitive pricing advantage.

In addition to Eltek products, Diversitec is a multi-year award-winning integrator for GE. We also offer Vertiv (formerly Emerson) and Alpha products; subject matter experts on staff.

Are you looking for new or hard-to-find telecom parts to keep your network operational?

Give us a call; we likely have that critical part to keep your network up and running. We stock, and quickly ship, new as well as manufacturer discontinued equipment. Our warehouse includes new, surplus, repaired, refurbished, and legacy telecommunications equipment:

- Switches, transport gear, and line cards
- Hundreds of manufacturers, new old stock (NOS)
- 50 years of telecommunications equipment
- Millions in new and secondary market inventory
- Diversitec is TL-9000 certified and we take pride in our outstanding customer service record

Need to integrate legacy equipment into your modern communications infrastructure? Replace worn out parts?

We do both for our customers, which include some of the world's largest telecom companies. Keep your networks up and your costs down. Call Diversitec, the industry's go-to service leader: telecommunications, healthcare, technology, rail, education, utility, and emergency operations.

- Repair Services
- De-Installation/Consignment

Telecom Spares / Refurbished

- 200,000+ products in stock

About Diversitec Family of Companies

Diversitec is a 25-year-old, TL-9000 certified, privately held Richmond, Virginia based company specializing in DC Power, batteries, logistics, kitting, virtual warehousing, and new, or hard-to-find manufacturer discontinued telecom parts such as switches, transport gear, and line cards. With respect to DC Power, Diversitec is a designated Eltek power electronics premier DC Power integrator for the United States; only one of five companies to receive this designation. In addition to Eltek products, Diversitec is a multi-year award-winning integrator for GE. We also offer Vertiv (formerly Emerson) and Alpha products.

Subject matter experts on staff to design, engineer, and provide turnkey DC Power back-up solutions including full repair services on telecommunications equipment.

The company also maintains millions in secondary market inventory that is new, new old stock (NOS), repaired, or refurbished; we cover nearly 50 years of telecom equipment from hundreds of manufacturers. Diversitec is under multi-year contracts with customers such as Verizon, AT&T, Frontier, Level 3, and Lighttower. We integrate legacy equipment into modern communications infrastructure and replace work out parts for some of the world's largest telecom companies.

We serve telecommunications, healthcare, technology, rail, education, utility, and emergency operations markets. Diversitec is the parent company for subsidiaries Edge MCS, LLC and Backhaul Engineering, LLC.

Backhaul Engineering

A Diversitec Company

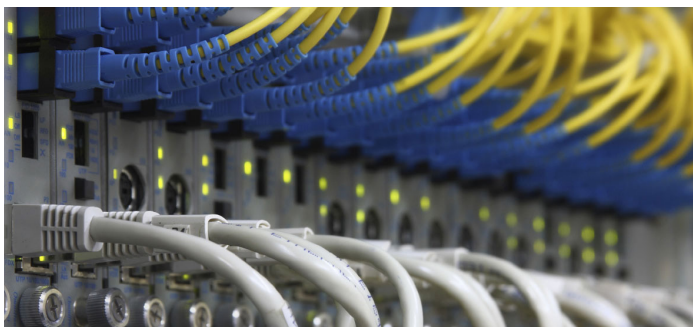

Backhaul Engineering is a single-source wireless engineering services company with more than a decade of industry experience. The wireless industry counts on us to provide high-quality engineering, design, and support services. Serving national and local clients: path engineering, spectrum management, interference mitigation, troubleshooting, drone services and our unmatched installation management services.

Designs are correct the first time, every time. Our clients are benefitting from efficiency, trouble-free operation and increased up time.

EDGE

MISSION CRITICAL SYSTEMS
A Diversitec Company

Based in Richmond, VA, Edge Mission Critical Systems (Edge MCS) is a global OEM for the pre-engineered, turn-key modular data center (MDC); the Binary Bunker and custom engineered MDCs. We offer a totally engineered, PE-stamped MDC specifically designed for edge network and modular applications where redundancy, excellent power density and highly efficient cost of ownership is required. Our MDCs are made of rigid, lightweight concrete unmatched in durability and energy efficiency. We are a single point of contact for project management, engineering, site preparation, fuel management, generator back up and custom engineered solutions.
